

CALVIN WONG

Entry-Level Cybersecurity Analyst | Identity & Access Management | Financial Services Operations
Toronto, Canada | 647 989 8972 | iam@calvinwong.ca | [linkedin.com/in/calvinkmwong](https://www.linkedin.com/in/calvinkmwong) | calvinwong.ca

PROFESSIONAL SUMMARY

Financial-services operations professional moving into cybersecurity, with four years at BMO safeguarding confidential client data, supporting audit and risk review, and catching documentation exceptions before they became risk issues. Certified in Security+, SecAI+, and Microsoft Identity and Access Administrator, with hands-on Python, SQL, and Azure work.

PROFESSIONAL EXPERIENCE

Private Banking Operations Associate | BMO Private Wealth Management

Toronto, ON | Jun 2025 – Present

- Safeguard confidential client information while processing account openings, maintenance, and service requests for high-net-worth clients, applying strict access-control and confidentiality standards.
- Recognized by branch leadership for opening six Ultra-High-Net-Worth client accounts within a compressed timeframe, earning a nomination for the firm's Grand Ovation award and commendation sent directly to management.
- Identified a manual, error-prone document-processing bottleneck and proposed an AI-assisted review agent, accepted by leadership for implementation; prototyped independently as the Account Onboarding Agent.
- Review sensitive client documentation to verify eligibility and detect discrepancies, and maintain audit-ready records supporting internal risk and audit reviews; both translate directly to security incident triage and compliance review.

Senior Process Analyst – Managed Product Services | BMO Wealth Management

Toronto, ON | Sep 2022 – May 2025

- Reviewed managed-program accounts for policy deficiencies, applying a security-conscious approach to identify exceptions before they became risk issues.
- Performed reconciliations across RIS and Wealth 360, investigating documentation gaps and resolving data exceptions; ran quality-assurance reviews and trained new employees on process controls.

Client Account Administrator | BMO InvestorLine

Toronto, ON | Mar 2022 – Aug 2022

- Maintained and secured physical and digital client records under compliance-driven retention standards, and provided front-line support for document-imaging systems, troubleshooting access issues under time pressure.

Developer | Maximilian Family Fund

Toronto, ON | Apr 2020 – Apr 2022

- Built data-analytics tooling in Python (MongoDB, MySQL, Kibana) to detect statistical anomalies in large datasets, applying fraud-detection techniques including Benford's Law, work that underpins security analytics and threat detection.
- Built a Tableau dashboard enabling drill-down analysis of operational data.

PROJECTS

Stale Account Detector | Python Access-Governance Tool

2026 | github.com/calwong88/stale-account-detector

- Evaluates a directory export against six detection rules: stale member and guest sign-ins, accounts never used since creation, disabled accounts still holding paid licenses, missing managers, and unredeemed guest invitations. Produces a severity-ranked report of the standing access that surfaces in SOX and OSFI reviews.
- Isolated CSV parsing behind a typed loader so a Microsoft Graph loader could run the same rules against a live Entra ID tenant; reports are reproducible to any past date, and all six rules are covered by 14 unit tests.

CERTIFICATIONS

Security & IAM: CompTIA Security+ (2025) · CompTIA SecAI+ (2026) · CompTIA A+ (2025) · Microsoft Certified: Identity and Access Administrator Associate (2026)

Cloud & Technology: Azure Administrator Associate (2020) · Azure Database Administrator Associate (2021) · Azure Fundamentals (2020) · ITIL 4 Foundation (2022) · Certified Associate in Python Programming (2020) · Google Data Analytics (2021)

TECHNICAL SKILLS

Programming & Data: Python, SQL, R, MySQL, MongoDB, PySpark, Apache Kafka

Cloud & Systems: Azure, Entra ID, Active Directory, Linux, Git/GitHub, REST APIs, networking fundamentals, scripting

Visualization & Tools: Tableau, Kibana / ELK Stack, Microsoft Excel

EDUCATION

Advanced Diploma, Marketing, George Brown College (2010) · Advanced Diploma, Paramedicine (partial), BizTech Institute College (2017)
